

## Instructions for sliding tag pocket page

Cut out pages and tag, cutting all in one piece. Carefully, using sharp scissors or a craft knife, cut along the dotted line on the page. Be careful not to cut all the way across. Fold the tag in half and adhere together. Working with the page now, fold as usual and carefully glue sides and top, leaving bottom open. Place the tag inside the pages and slip it up through the slit. Now glue the bottom of the page together. Your tag should now slide up but not fall out.
