## A little about me

## STATEMENT

I am a very focused and determined individual who has just finished an Industrial Design degree at The University of Hertfordshire.

My passion for design allows me to approach problems and situations from a different perspective. Using my prowess, I am able to assess situations and collate the necessary knowledge required to solve problems quickly and efficiently. I always strive to challenge and push the boundaries of my potential to better myself as an individual and a team member.

I see one of my main strengths being my adaptability. I engage in all aspects of design so that I'm better prepared for many situations.

- Personal Qualities**
- Works well under pressure – quickly adapts to unforeseen changes.
  - Follows instructions to precise accuracy – produce results without requiring constant assistance.
  - Friendly, inquisitive, hardworking, funny, eager and passionate.
  - Computer literate – I am an advanced user of many computer software applications and always learning more. Proficient in both MAC and PC.
