

## PAEDIATRIC SYMPTOM LINKED WITH COVID-19

### Issue

A study has shown that the symptoms of a rare disease known as paediatric inflammatory multisystem syndrome (PIMS-TS) vanish after six months.

### Background

The paediatric inflammatory multisystem syndrome (PIMS-TS) is associated with SARS CoV-2 infection and affects children.

### Details

- The children diagnosed with Covid-19 showed the paediatric inflammatory multisystem syndrome (PIMS-TS) and were able to recover within six months.
- Paediatric inflammatory multisystem syndrome (PIMS-TS) is an inflammatory syndrome that affects multiple parts of the body.
- There is still no clear reason for emergence of the condition but it is suspected to be caused by immune overreaction.
- It usually starts after 4-6 weeks of contacting mild or asymptomatic form of covid-19 infection.

### Symptoms

The symptoms of the disease include fever, eye infection, rashes and gastrointestinal infections such as nausea, stomach ache and diarrhoea. Severe bouts can lead to multi-organ failure and death.

**Results of study**

The end analysis showed that children affected by the condition were
